## 1. OVERALL PERFORMANCE

The Graduation Pilot project is funded by United Nations High Commissioner for Refugees (UNHCR) and aims to promote Economic Inclusion and Self-reliance of refugees and their host communities in RWANDA. It refers to a comprehensive process of supporting vulnerable people with capacity-building sessions and cash grants to lift themselves out of extreme poverty. Caritas Rwanda implements this project in Mahama and Kiziba refugee camps targeting 70% of refugees and 30% of host communities as articulated in the UNHCR-MINEMA livelihoods joint strategy (2021-2024).

To realize the intended results, a four-pillared approach is used which includes: Social protection, livelihoods, financial inclusion, and social empowerment.

### Summary of major achievements: January 1 to May 31, 2023

During this reporting period, the following achievements were realized:

- **Social protection pillar.** Given that under this pillar ultra-poor households have their immediate basic needs, 125 most vulnerable refugee households were selected to be supported with monthly consumption fees. In Mahama, 110 with 189 family members, and 15 households in Kiziba with 54 household members. A fee of 7,000Frw is planned per person and month.
- **Livelihood pillar.** With this pillar, we focus on ensuring that Households have diversified sustainable livelihoods. In this reporting period, a total of 1,143 participants including 800 refugees and 343 host community members were trained on entrepreneurship, Business plan development, Savings and Internal Lending Community (SILC) approach, and Financial Literacy. These training sessions prepared them for an 800, 000Frw cash grant to be invested in a variety of livelihood activities. That amount will be provided in June.
- **Financial inclusion.** Within this reporting period, 1,143 beneficiaries were trained on financial literacy and SILC methodology and gathered into 54 SILC groups to pull up their savings and get small loans. In total, 99.6% of the project beneficiaries are members of SILC groups and have accumulated Frw71,256,050 of savings and disbursed Frw70,625,010 in loans to members while Frw55,149,147 are kept in their SILC groups' bank accounts. Additionally, 51% of beneficiaries were supported to open their bank accounts in line with financial linkage.
- **Social Empowerment.** Households are supported to have positive behavior change and increased social inclusion. The active participation and ownership of SILC groups by gaining access to financial services, combined with productive asset transfer in the form of cash grants and regular household visits, gradually influenced participant behavior to feel socially empowered.

## 2. CHANGES AND AMENDMENTS

The reporting timelines have changed for mid-year reporting. It shifted from July 15 to June 15.

No other major change to be reported so far.

### 3. ACTUAL PROGRESS ACHIEVED TOWARD PLANNED RESULTS (MEASURING RESULTS)

The table below summarizes the actual results achieved against the targets reported from the project start date, until the end date of the reporting period.

### 3.1 Enrolment of Households in Graduation Project

Within this reporting period, in collaboration with MINEMA, UNHCR, community members, local leaders, and other key stakeholders, 1,143 beneficiaries (800 refugees and 343 host community members) were enrolled from the Kiziba and Mahama refugee camps and their host communities following the agreed selection criteria.

**Graduation project followed the followed criteria:**

- Age band of 18-59 years old (Economically active) 18-59;
- Household at high risk of vulnerability (PLD; Survivors of SGBV, Poverty,);
- Willingness to participate in the graduation process;
- Capacity to manage income-generating activities;
- Active refugee in the camps or national living in the host community;
- Able to engage him/herself without sticking to rumors;
- Willing to maintain good relationship with other beneficiaries;
- Beneficiaries with profitable business ideas; and
- Gender and disability inclusion will be taken into account.

### 3.2 Recruitment, training, and Quarterly Meetings of Volunteers

Caritas Rwanda uses community-based volunteers to support the project field staff in monitoring and mentoring the project beneficiaries in their businesses related to either income-generating activities or SILC groups to reach the beneficiaries for the required amount of time.

In total, 80 volunteers serve the Graduation project including 54 newly recruited and existing 26 ones. The table below shows the volunteers' categories according to sex, location, and country of origin.

Kiziba & Mahama	Total volunteers	Refugees				Hosts	
		Burundians		Congolese		Rwandese	
		Female	Male	Female	Male	Female	Male
Mahama	48	8	16	5	5	5	9
Kiziba	32	0	0	7	18	6	1
<b>TOTAL</b>	<b>80</b>	<b>8</b>	<b>16</b>	<b>12</b>	<b>23</b>	<b>11</b>	<b>10</b>

All the above (80) volunteers were **trained on entrepreneurship, Business plan development, SILC methodology, and financial literacy** to provide them with knowledge and skills for them to be able to perform their primary assignment of coaching, monitoring, and mentoring SILC groups and beneficiaries in businesses until they reach the autonomy and self-management level.

With UNHCR technical support, the volunteers were also trained in **protection and community mobilization**. They emphasized the protection principles such as "DO NO HARM" and protection from sexual harassment, exploitation, and abuse. Protection of the most vulnerable people is the responsibility of everyone who works in the

Training of volunteers on SILC methodology. Mahama, March 2023

humanitarian sector. In addition to the training, Caritas Rwanda conducted **quarterly meetings with community-based volunteers** at all project implementation sites. Meeting participants discussed the different points concerning the graduation project: the project 2023 work plan, SILC Bookkeeping, the progress of project activities, monthly reporting form, PDM Reporting form, quarterly reporting form, code of conduct, timesheet form, and so on.

### 3.3 Training of Beneficiaries

During this reporting period, 1,143 newly selected beneficiaries were trained on SILC methodology, financial literacy, IGA, Entrepreneurship, and business plan development.

#### - Training on SILC methodology and financial literacy

This training was conducted over 4 days and it focused on the SILC methodology overview and background, its basic principles and norms, SILC structure and management, SILC regulations, SILC

record keeping, and how to conduct SILC meetings as well as principles of share-out practices. The participants also received training in financial literacy, with a focus on the principles of wise spending, effective money management, and the significance of savings plans and microloans. The participants were excited to participate in SILC groups and to receive assistance in opening their bank accounts both individually and as SILC groups. This was an opportunity to focus on financial inclusion.

**- Training on IGA, Entrepreneurship, and business plan development**

As content, the training discussed the following topics: Qualities of a good entrepreneur; steps for transforming a business idea into reality; controlling the use of resources using financial books such as cash book, purchase book, sales book, and debtor's book. The training explored more strategies for choosing viable income-generating activities such as market analysis, knowledge and skills in running the IGA, initial working capital and running capital, selling and counting interest, and finally household expenditure. During this training, beneficiaries were reminded to cater for the bookkeeping.

As a result of gained training, the project beneficiaries start up or expand their business. That creates jobs and contributes to the general objective of moving out of poverty.

For instance, 4youth beneficiaries graduated in culinary arts in 2022 and have started a company called BEST YOUTH RESTAURANT MAHAMA Ltd. The company was linked with UMUTANGUHA MICROFINANCE for getting a loan to perform tenders of supplying restaurant services during the training of beneficiaries under the Graduation Project this year 2023. Up to now, they have had a 1-year renewable contract with CARITAS RWANDA to supply water, Juice, tea Break, and Lunch during training and meetings organized by Caritas Rwanda in Mahama/Kirehe.

*Trainees are served lunch by the best Youth Restaurant Mahama Ltd. April 2023*

**3.4 Grouping the project beneficiaries into SILC groups and SILC monitoring**

As a result of the training, 18 new SILC groups were created in Kiziba camp including 13 groups of refugees and 5 host community members while 36 groups were created in Mahama including 25 SILC

groups of refugees from the Camp and 11 SILC groups of host community members. In total, 76 SILC groups, including 22 existing and 54 new ones, were monitored in this reporting period and they count together 1,562 members which indicates a membership rate of 99.6% of graduation project beneficiaries. The SILC groups are composed of an average of 20 members group. They meet weekly. Members meet every week and contribute to the group's fund savings as well as social funds. The average monthly savings per member is 16,000Frw. The created SILC groups received their SILC kit composed of a SILC register, pens, rulers, individual passbooks, cash boxes, bowls, pencils, calculators, and rubbers.

**The following table shows the aggregate wealth of the groups (in Frw):**

As all the 76 SILC groups are encouraged to work with financial institutions, their money is kept in their bank accounts when it is not lent to members. The financial linkage of SILC groups is 57.8%.

### **3.5 Providing beneficiaries with production training for agriculture /livestock activities”**

In this reporting period, 362 beneficiaries, 140 from Kiziba and 222 from Mahama who preferred agriculture and livestock as business orientation were trained on Agriculture and livestock promotion focusing on modern agricultural techniques. The training emphasized Soil management, soil erosion control, soil improvement, agriculture practices, pest, and plantation diseases control, types of agriculture inputs, Conditions for animal farming success such as good shade, good nutrition/feeding, protection, and disease control, and reproduction follow up, farming techniques, especially for pigs, goats, chickens, and cow.

At the Mahama site, the existing beneficiaries, 2 of whom are raising livestock, during the month of May 2023 were linked to the "SONARWA" livestock insurance company and took insurance for 300 chickens for a year. Beneficiaries who are raising livestock, particularly pigs were linked to the "RADIANT INSURANCE COMPANY" to obtain the 32-pig assurance.

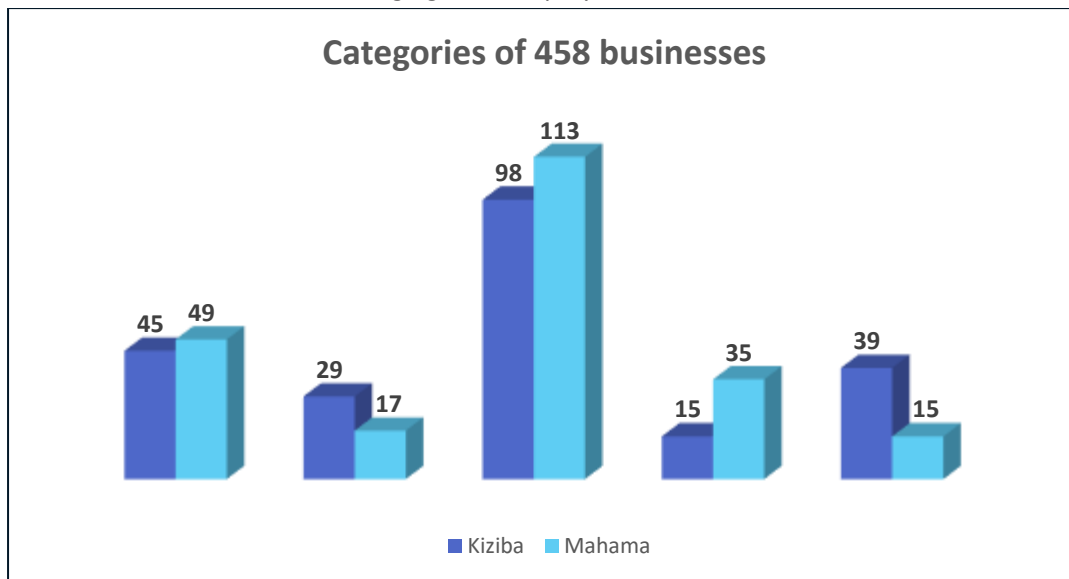

### 3.6 Providing beneficiaries with a cash grant

The project beneficiaries' cash grant disbursement is planned in June for 1,143 beneficiaries. But so far grant has yet to be disbursed.

### 3.7 Monitoring and mentoring in their Income Generating Activities

After disbursing cash grants to the beneficiaries, Caritas Rwanda does regular monitoring for strengthening the capacity of beneficiaries to well manage their income-generating activities. In this reporting period, 458 beneficiaries 'businesses were monitored, 229 from Mahama and 229 from Kiziba. Those businesses are running their businesses within or around the refugee camps. this monitoring was conducted to ensure effective implementation and progress toward the move out of extreme poverty.

It was observed that the businesses are categorized mainly into 4 sectors: Commerce, Agriculture & Livestock, Services, and Vocational activities. At the visit, 81.4% of the visited beneficiaries self-reported a positive change in their income. During the same monitoring exercise, it was revealed that 90.7% of beneficiaries of working age are employed.

Generally, these 458 businesses are well operating and their monitoring continues to ensure continued capacity building. However, the other 12 businesses were closed due to the following reasons.

Reason for business closure	Site		TOTAL
	Mahama	Kiziba	
Resettlement	3	4	7
Voluntary repatriation	2	0	2
Other reasons (Drop out and jail)	1	2	3
<b>TOTAL</b>	<b>6</b>	<b>6</b>	<b>12</b>

**Agreement Symbol: RWA01/2023/000000213/000**  
**Agreement Amendment, if any 000**  
**Project Performance Report (Mid Year report)**

Beneficiaries who visited their businesses during different monitoring sessions gave testimonies regarding changes that came into their lives thanks to Graduation project support. The following are some of the stories recorded.

**Story 1. A seller of clothes**

Dusenge's business. February 2023

Dusenge Felix is a 34 years old man Burundian with a wife and 4kids. He lives in Mahama refugee camp and was supported by Caritas Rwanda with training and received a grant of 800,000Frws to run a cloth-selling business.

At the time of the visit, Dusenge said: "I am very thankful for the grants I received from Caritas Rwanda because it helped me to overcome poverty, I didn't have any Income activity for my family and it was not easy to satisfy my family's basic needs. But when Caritas Rwanda came, they trained me a lot and gave me a grant of 800,000frws in last

year (June 2022) which I used to start selling clothes, I started by buying 1 package (ibaro) of clothes which cost 600,000rwfs but today I can buy 2.

I will always be grateful to the staff for helping me get to the INKOMOKO financial institution, where they are in the process of giving me a loan for \$1,000,000 (I have already signed all the necessary paperwork). This loan will increase my capital from \$1,350,000 to \$2,350,000, and I will pay it back over the course of six months".

He continued with his so far achievements saying: "Now, my family is better off because we easily get good and sufficient food at least twice a day; we get good quality clothes as I am selling them and get money; I managed to give a permanent job to one of my neighbors and I pay him regularly; my children attend school regularly and the general life conditions of our family were improved significantly". "I am and I will always be thankful to Caritas for they brought hope and dignity to into my family". He concluded.

## Story 2. Vocational activities are changing people's lives

NIYONZIMA in his tailoring business. Kiziba, May 2023

**NIYONZIMA Nzayisenga** is one of the Beneficiaries supported in 2022 through the Graduation Project in the Kiziba refugee camp. After completing his secondary studies in mathematics, physics, and chemistry he was jobless and his tailoring skills were not exploited as he had no resources to buy at least a single sewing machine; he used to expect all support from his parents with a

very limited capacity to meet the basic needs of their children. He was identified in 2022 and trained on Savings and Internal Lending Communities (SILC) and financial literacy; entrepreneurship, income-generating activities, and business plan development. The training was accompanied by an 800,000Frw cash grant to implement his business of sewing. After receiving the grant, he took the opportunity brought by Caritas Rwanda and expanded his mind, and found a suitable place for his business in Kigali, Kicukiro Centre.

At the time of the visit, he said: *“I am a member of SILC called Abahuje where I save 3000Rwf every week, and I recently shared-out 160,000Frw. Last year I took a loan of 200,000Frw in total from my SILC group to pay school fees for acquiring new skills in making clothes commonly known as **Made in Rwanda** and I’m making a profit from skills for completing those gained from Caritas Rwanda. My monthly income is 150,000Frw (on average). It helps me to pay house rent, satisfy my family’s basic needs like quality food, clothing, communication, and support other family members. Most importantly I manage to pay school fees for my small brother.*

*“I had no idea about what I could do, I was desperate about the future of my family and mine but now the shadow is over and the light is in front of me, believe me, only the sky is the limit”,* end of quote.

**Story 3: “Now, we are Entrepreneurs.** Our company: BEST YOUTH RESTAURANT MAHAMA LTD is making our dreams come true”. Steven, the BYRM Ltd Managing Director, declared.

(Left) Young graduates from TVET school received start up kit at Mahama, in November 2022. (Right) in April, they have created a company that was performing a tender of serving 380 training participants with lunch, coffee and water for 12 days of training. They are thankful to Graduation project.

#### 4. POPULATION COVERAGE

This year the project is serving 1,568 households from Mahama and Kiziba. The following is the distribution of those beneficiaries per zone and population group.

Site	Population group	# Per population group	# per site	Total population
Kiziba	Refugee	416	612	1,568
	Host community	196		
Mahama	Refugee	669	956	
	Host community	287		

#### 5. PARTICIPATION OF AND ACCOUNTABILITY TO THE AFFECTED POPULATION

It was found that the targeted participants are involved and take ownership of the project interventions during the reporting period. The various and varied livelihood activities practiced by participants in both host communities and refugee camps serve as evidence of this. Participants did show a willingness to fully commit to cooperating with host communities to promote integration. We

have identified refugees living in camps who have bought land parcels, while others are renting land in host communities. This was the outcome of successful district-level collaboration and partnership with the local government, which allowed refugees access to land.

## **6. RISK MANAGEMENT AND INTEGRITY**

The project did not record any risks during implementation during this reporting period.

## **7. PROGRESS ACHIEVED TOWARDS PROTECTION AGAINST SEXUAL EXPLOITATION AND ABUSE (PSEA) CAPACITY-STRENGTHENING IMPLEMENTATION AND MONITORING PLAN *(if applicable)***

All Caritas Rwanda staff attended a 4-day training on Safeguarding and Protection for Sexual Harassment, Exploitation, and Abuse (PSHEA) at Centre d'Accueil Bonne Esperance - Kigali.

This session increases their capacity and readiness to work with the community without exposing themselves or the project beneficiaries to potential risks of sexual exploitation and abuse. In addition, Caritas Rwanda has worked on the implementation of the PSEA capacity strengthening plan which was planned together with the protection UNHCR team in November 2022 and there is good progress towards the full capacity of the organization.

## **8. EXIT STRATEGY AND SUSTAINABILITY**

The graduation project has linked beneficiaries with financial institutions that can finance their businesses and linked them to other products and services to ensure that participants from both host and refugee camps continue to have access to financial services,

Furthermore, another factor contributing to the exit and sustainability mechanisms is the management of community-based volunteers. To ensure that households and saving groups are mentored and coached on a timely and consistent basis by people who live in the community alongside the beneficiaries. Caritas, as a local implementing partner, builds the capacity of volunteers so that they can transfer acquired knowledge and skills to the targeted participants.

The synergy and sustainability of the project initiatives are demonstrated by the active involvement of local government authorities via Joint Action Development Platforms at the district level closely collaborating with UNHCR and MINEMA in management meetings on a monthly and quarterly basis

## **10. LESSONS LEARNED**

Refugees have found an opportunity of the potential market out of refugee camps.

It was noticed that it takes a lot of time and energy to get documents for bank account opening which may delay the cash transfer process and negatively affects the implementation of some beneficiaries' IGAs. Therefore, the collection of support documents for bank account opening should start immediately at the time a beneficiary is identified and confirmed.

## **11. VALUE FOR MONEY/COST EFFECTIVENESS**

The Caritas Rwanda competitive procurement process enables the selection of the best service providers with competitive technical and financial offers. This enables cost-effectiveness to be met.

## **12. COORDINATION**

Regular meetings organized by UNHCR and MINEMA with all stakeholders (Camp Management, Local government leaders, and implementing partners) are effectively contributing to the success of project

implementation success. This is a platform where stakeholders discuss selection criteria, the package is given to beneficiaries, and the level of effort to be provided by each stakeholder to ensure effective service delivery. In addition, there was a well-organized joint field monitoring conducted by UNHCR and MINEMA across all sites, and that contributed a lot in terms of creating a harmonized manner of supporting refugees through livelihood interventions.

Kiziba stakeholders meeting. January 2023
